

Clément LAFON

Cloud & DevOps Engineer

Bordeaux, France (33000) | lafon.cl@icloud.com | +33 7 60 79 28 07 | 27 years old
linkedin.com/in/clement-lafon | github.com/L-Clem

Summary

Cloud & DevOps Engineer with 4 years of experience delivering Kubernetes and Cloud platforms in large-scale, critical environments. Skilled in **Kubernetes platform operations, Cloud infrastructure, systems administration, scripting, Infrastructure as Code, CI/CD, DevSecOps integration, and FinOps**, supporting hundreds of clusters and platforms used by thousands of internal users. Seeking **relocation opportunities in Japan** as a Cloud & DevOps Engineer, Kubernetes Engineer, Site Reliability Engineer, or Platform Engineer.

Languages

French: Native,
English: Professional working proficiency,
Japanese: Beginner (currently learning).

Experience

CGI, Cloud & DevOps Engineer | Full-time

Le Haillan, France (33185)
 Nov 2025 – Present

- Operate and manage the lifecycle of **hundreds of AKS and on-premises Kubernetes clusters** supporting a globally distributed, business-critical **Orange Business** platform, driving reliability, automation, and operational improvements.
- Design and develop **Python-based Azure FinOps tooling** to improve cloud cost visibility and support infrastructure optimization.
- Troubleshoot **production incidents across Kubernetes clusters and platform services**, performing root cause analysis and implementing corrective actions to reduce recurring failures.
- Served as a **Cloud Administrator within CGI's Cloud Center of Excellence**, supporting multiple client environments alongside a team of 10–15 cloud engineers.

CGI, Cloud & DevOps Engineer | Apprenticeship

Le Haillan, France (33185)
 Sept 2022 – Nov 2025

- Owned the architecture and delivery of an on-premises Kubernetes-based engineering platform **supporting several thousand internal users across Europe**.
- Evaluated technical trade-offs and **selected the technologies and networking stack** from L3 to L7, defining the infrastructure architecture and cluster topology.
- Operated Kubernetes environments based on kubeadm, RKE2, and K3s, addressing **security, high availability, performance, scalability, and lifecycle requirements** for critical developer applications.
- Selected and led the integration of **eight DevOps and DevSecOps components** (GitLab, Jenkins, Nexus, Vault, Keycloak, Grafana, Argo CD, and Dependency-Track) into a unified internal engineering platform.
- Provided advanced technical support to engineering teams, **diagnosing complex Kubernetes, infrastructure, deployment, and application** integration issues.
- Documented known issues, troubleshooting procedures, verification steps, and resolution guidelines to **improve support efficiency and knowledge sharing**.
- **Automated recurring operational tasks** and infrastructure workflows using scripting and Infrastructure as Code, reducing manual intervention and improving platform reliability and consistency.
- Improved CI/CD architecture and pipeline templates, **increasing deployment frequency** by approximately 60%.
- Coordinated and mentored technicians involved in platform operations, **providing technical guidance and contributing to engineering decisions**.

Human Immobilier, .NET Software Engineer | Internship

Bordeaux, France (33000)

Jan 2022 – Feb 2022

- Developed and maintained **business applications** across backend services, APIs, and data layers using C#, .NET, Razor, and Microsoft SQL Server databases.
- **Designed, developed, and optimized REST APIs** enabling seamless integration with front-end systems.
- Utilized ADO.NET, ASP.NET, and Windows Forms to deliver efficient and responsive internal applications, **doubling development speed** for tasks like financial PDF scanning.

Education

MSE in Computer Science, Professional School of Computer Science (EPSI)

Bordeaux, France (33000)

Oct 2023 – Sept 2025

- Completed an MSE program leading to the “**Expert in Information Technology and Information Systems**” qualification, registered at RNCP Level 7 under [RNCP 35584](#) ([Verify credential](#)).
- Elected **class representative throughout five academic years**.

BSc in Software Engineering, Professional School of Computer Science (EPSI)

Bordeaux, France (33000)

Sept 2020 – Oct 2023

- Completed a Bachelor’s program leading to the “**Application Designer and Developer**” qualification, registered at RNCP Level 6 under [RNCP 31678](#), with a specialization in Artificial Intelligence.

Technologies

Cloud: Microsoft Azure, AWS.

Containers & Orchestration: Kubernetes, Docker, Helm, kubeadm, RKE2, K3s.

Infrastructure as Code & Automation: Terraform, Pulumi, Ansible, Python, Bash, PowerShell.

CI/CD, GitOps, DevSecOps & Observability: GitLab, Jenkins, Argo CD, FluxCD, SonarQube, Dependency-Track, Grafana.

Security & Identity: Vault, Keycloak, OAuth 2.0, SAML.

Development: Python, Go, C#, SQL, .NET, RESTful APIs, Microservices.

Databases & Messaging: PostgreSQL, MongoDB, Redis, RabbitMQ, Apache Kafka.

Operating Systems: Linux, Windows.

Project management & Collaboration: Jira, Confluence, WikiJS, Gantt planning, Microsoft Teams, Mattermost.

Additional Exposure: Networking, JavaScript, TypeScript, Java, PHP, Node.js, React, Angular, Spring, Laravel, Flask, Machine Learning, LLMs, NLP, and Generative AI.

Certifications

Microsoft Certified: DevOps Engineer Expert

June 2026 – June 2027

Microsoft Azure

([Verify Microsoft credential](#))

Microsoft Certified: Azure Administrator Associate

June 2026 – June 2027

Microsoft Azure

([Verify Microsoft credential](#))

AWS Certified Solutions Architect – Associate (SAA)

Sept 2023 – Sept 2026

Amazon Web Services (AWS)

([Verify Credly credential](#))

Certified Kubernetes Administrator (CKA) — Previously Certified

May 2023 – May 2026

Cloud Native Computing Foundation (CNCF)

([Verify Credly credential](#))

Interests

Cloud architecture, technology research, strength training, science, leadership, networking, and international cultures.
